Near normal temps for the week with highs in the upper 50's-lower 60's and lows mainly in the upper 20's-lower 30's. Rain and some scattered wintry precipitation later in the week has helped to increase soil moisture. Most of the county received between 1.5" to 2" of rain. Main farm activities included harvesting Christmas trees, tending livestock and winterizing equipment.  
**Stanley Holloway – Yancey County Extension**

Rainfall was above average with 1"-2+" for period with temperatures near normal to slightly above normal ranging from 20s - 60s.  
**Robert Hawk – Jackson/Swain County Extension**

Frequent rainfall and high seed moisture content limiting harvest and field work.  
**Mike Carroll – Craven County Extension**

Rain continues to delay cotton and soybean harvest.  
**Cathy Herring – Central Crops Research Station**

Rain delayed field but most crops have been harvested.  
**Daniel Simpson – Pamlico County Extension**

Rains at the beginning and the very end of the week kept field conditions wet enough to slow or stop soybean harvest. Late beans are still standing up OK but the quality is slipping. Wheat looks good to excellent across the county.  
**Mark Seitz – Pender County Extension**

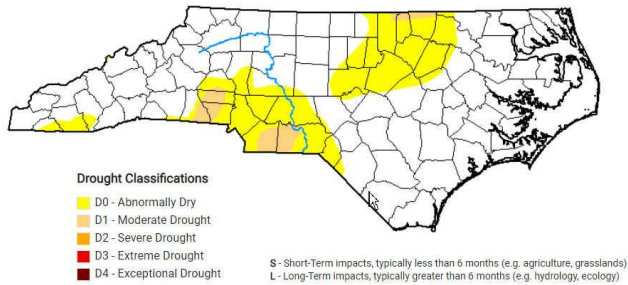

Cotton and soybean harvest continues as growers close in on the end of harvest season. Small grain planting is wrapping up for most. What small grain is up looks good so far.  
**Mac Malloy – Robeson County Extension**

Crop information in this report is provided voluntarily by county officials of the Cooperative Extension Service, FSA, NRCS, and other knowledgeable individuals.
